*Break free from Depression and  
other emotional problems*

Avoid  
dealing  
with  
these  
problems  
alone

Seek help  
and give  
yourself  
the  
freedom  
you truly  
deserve

# PROGRAMS

## *Outpatient – Children*

For children and families who are experiencing emotional, social and/or behavioral difficulties such as Attention Deficit, the clinic provides a comprehensive program of assessment, referral, psychiatric and psychotherapy services. Treatment may include individual, family or group therapies, with a major emphasis on short-term solution focused therapy.

## *Outpatient – Adult*

Depression can make you feel hopeless and helpless. Any other emotional problem, when untreated, can lead to more problems. But just taking the first

step—deciding to get treatment—can make all the difference.

MHS services include individual, couples, family and group counseling, psychiatric evaluations, medication management and treatment.

After being assessed, individualized treatment plans are developed in cooperation with patients and their families.

## *Wrap-Around — (EPSDT: Early Periodic Screening Diagnosis and Treatment Services)*

This program provides individualized community-based counseling services which address the overall needs of the child including educational, developmental, and emotional. Services are provided in the home, school, or community and must be

deemed medically necessary by a physician here at MHS.

## *Intensive Case Management*

Comprehensive needs assessment is provided for children and adolescents under the age of 21, who are returning from psychiatric hospitalization or out-of-home placement. Small caseloads insure frequent contacts within 24-hours, including on-call availability for patients and their families. This program assures continuity of care via interagency service planning and in-home and community support.
